[Expression](#)

Go to Object > Ungroup. You won't see a visible change in the image until you use the selection tool to select individual letters.

[About Me](#)

Hold the shift key and use the selection tool to select every other letter.

Bring the selected letters to the front with Object > Arrange > Bring to Front.

Click away from the image to deselect the letters. Adjust the position of the ribbon if necessary.

That's all there is to it!
